

### Cygnus Smoke & Heat Detection Infographic

© Checkpoint Products 1800 273 473

1. **Cygnus Smoke and Heat Detectors** are constantly active - even after hours.
2. **When fire is detected** they instantly send message via **Wireless Network** to **Cygnus Control Panel**
3. **Site wide notification** can be programmed to activate if required.

4. **Cygnus Control Panel** sounds alert and displays location of fire
5. **Message sent to Staff or Third Party Security** (optional)
4. **Incident automatically logged** and recorded with **Time, Date and Location**
